FORGED IRON TRIM OPTIONS

Trim Your Doors With Ease

Memphis Steel & Iron Works not only brings you the best forged iron doors, but also the easiest to install and trim out. By utilizing a standard 6" jamb depth, Creative forged iron doors provide the perfect size to be utilized with both 4-9/16" and 6-9/16" wall depths.

A standard offering of four Flex Trim profiles (shown below) accommodate both straight and radius trim needs. Without the deterioration associated with real wood, virtually no seams to crack, and the ability to be painted or stained, Flex Trim moldings meet the requirements of discerning builders and homeowners.

4064-BR
1-1/4" x 2" Brickmold

KCR627PR
7/8" x 1-7/8"
Overlapping Profile
(for exterior wall that may be recessed)

VIK629PR
1" x 2-1/2" Stucco Trim
(can be used with either side profile)

ABS34X112
3/4" x 1-1/2"
Flatstock
